

NOTES

- Span and rise dimensions are nominal and are measured to the inside crests of corrugations.
- Allowable heights of cover shall be within the limits indicated in the table included hereon. Minimums and maximums are shown.
- Unless indicated otherwise a 250 mm depth (over the inside crests of corrugations) of earth shall be placed in the invert of the Structural Plate Underpass, Design 1, for its full width and length. The earth shall consist of natural occurring materials available in the vicinity of the structural plate underpass installation.
- Designed for H-20 live load and maximum allowable soil pressure of 300 KPA.

ELEVATION

ALL DIMENSIONS ARE IN MILLIMETERS
UNLESS OTHERWISE NOTED

STRUCTURAL PLATE UNDERPASS DESIGN 1
